Indonesia's Growing Financial Literacy

According to Indonesian Financial Services Authority (OJK), Indonesia's financial literacy rate is at 29.7% (2016) and is expected to increase to 35% by the end of 2019. Hence financial companies play a significant role in boosting the growth of financial literacy and inclusiveness.

Investment Opportunity to Develop a Robo-Advisor Feature

The Company is seeking

\$1.2M

from a Co-Investor, with a funding worth of \$800K by a VC already on hand.
