Answering the Nation's Need of Reducing Unmanaged Waste, Serving:

Households

Trash-for-Cash mechanism paying users in exchange for their domestic waste and data.

Corporations

Providing recycling and social-impact solutions including campaigns and plastic recovery.

Government

Municipalities are offered The Company's regional waste management service.

Acquiring Data Via Local Partners to Create Circular Economy

The Company's business model connects parties to take part in each process of waste treatment. The synergies are built in order to gain data on the garbage stream and use.

The COO holds a master's degree in Human Resources Management. Prior to joining The Company, he was the Vice President of an IT Company, where he handled tasks such as project management, finding solutions, and art direction.

A Green Solution with Economic Value Suiting the Country's Development Plan

- Globally, between \$80 billion and \$120 billion worth of plastic packaging is lost to the economy every year as packaging is discarded after its first use. **(NPEC, 2017)**
- The Country's government aims to improve waste management by increasing trash processed from 67.5M tons by 2019 to 339.4M tons by 2024 **(The Country's Building Plan 2020-2024)**
- The per capita Municipal Solid Waste (MSW) generation in ASEAN is 1.14 kg/capita/day. In terms of total annual MSW generation, The Country generates the highest quantity of municipal waste with 64 million tonnes/year. **(WEF, 2020)**
